

Porty używane przez Windows Server System

Mała rzecz, a cieszę się - tabela ze spisem portów używanych przez usługi produktów rodziny Windows Server System. Sprawa niby oczywista dla większości administratorów, jednak pytania z tego zakresu przewijają się nieustannie - z determinacją wracając przy okazji kolejnych ataków robaków typu Blaster. Proponujemy zatem umieścić sobie pod ręką naszą ściągę. Nieoceniona pomoc przy konfiguracji firewalli.

Mała rzecz, a cieszę się - tabela ze spisem portów używanych przez usługi produktów rodziny Windows Server System. Sprawa niby oczywista dla większości administratorów, jednak pytania z tego zakresu przewijają się nieustannie - z determinacją wracając przy okazji kolejnych ataków robaków typu Blaster. Proponujemy zatem umieścić sobie pod ręką naszą ściągę. Nieoceniona pomoc przy konfiguracji firewalli. Postaramy się także w miarę możliwości rozwijać tą listę o inne, często pojawiające się zapytania (np. popularne porty ICQ, porty do przekazywania przez firewall połączeń głosowych, serwerów gier itp...).
